

## LET'S TEST OUR COMMUNICATION SKILLS

Grade level : Secondary 1

This activity is designed to work on communication skills with peers.

### Goal

Understand the importance of communicating in a clear and precise manner.

### Material

- Printed images\* (for half of the group)
- Blank sheets of paper (for the other half of the group)

### Procedure

Divide the students into groups of two. Place partners back-to-back and provide one partner with the printed image and a blank sheet for the other partner. The person with the image will then describe what they see for their partner to recreate on their paper. Once they are done, it's time to compare the original and the creation!

**Additional information:** \*Pick images that are relatively easy to draw: animals, geometrical figures, still life, etc. The focus must be on communication. Invite the students to share their experience by asking them some questions.

### For example:

What did you find was the hardest part of the process?

How did you find the right words for your partner to understand and recreate the image?

Is the new creation similar to the original?
